- Good Kid School

Basic Need Improvement

- Social Activity

In these issues:

ISPP NGO Fair

Asanga International Aid

Future Plan

Farewell Party

Boarding Rooms Building

House Building

Trees Planting

Karuna Kumar School

The main objective is to enhance the quality of education from the basic levels and opening the opportunity of education for all children who are living with poor conditions. Karuna Kumar School provides a full-time education to children from kindergarten to Grade 3. They are then transferred to public school in Grade 4.

Our staff and children from Karuna Kumar School (KKS) have been invited to attend the ISPP NGO FAIR on 20th August 2014, Phnom Penh city with an aim to share our experience, presentation, showing products and more importantly, leading some activities in group called “ Tree and Life”.

Asanga International Aid

On 3rd to 7th of August 2014, A group of Asanga International Aid from Taiwan has conducted a four-day health check event for our children and teachers, monks, nuns and local community.

Their activity has been reflected on the extreme contributions, consciousness and compassions to develop and improve the well-being of the overall people in a rural area and as the world.

Future Plan

With year-to-year growths of the children in the community, we are trying to expand our operation by purchasing a space land for constructing a new school building for children to fully have access to educational services in the community as well as being consistent with the guidelines of Royal Government of Cambodia.

However, Green Umbrella is very highly committed to communicate with its partners, donors, private sectors, and other NGOs in Cambodia to find out the source of

fund and make its endeavors to make fundraising in any country as much as possible to build a new school for the future.

Photos of new land size 2417 m² funded by Asanga International Aid.

Good Kid School

In order to provide an opportunity to monks, students and youths building their capacity of Foreign Languages (FL) and Computer Skills (CS), GKS is setting up part-time English learning program that students are affordable to pay.

Good Kid School (GKS) actively contributes to develop and build the capability of International Language for students to get a high rate of their English usage in Cambodia as well as pushing and motivating them to resume their study at the university after graduating at the High School and a full opportunity to compete in the labor market when ASEAN integration is coming soon.

Besides English, Good Kid School (GKS) is also organized a part-time computer program for the students who are aiming at understanding about New Technology called “ Information Technology” that is being very popular at the present time and a convenient equipment for people, students, staffs at company, organization and state.

As a matter of fact, the project has been running by a group of students called “ Voluntary Teacher of English ” from Tonle Bati High School. Some of them are carefully and actively learning in Grade 11 and Grade 12. Fortunately, they have just taken the exam of the Completion of Grade 12 (Back II) and then they will continue their study at university in Phnom Penh, anyway we would like to express our deep gratitude and thanks for their heartfelt contributions, a farewell party was also celebrated for them and sent them some messages for the future plan and preparation.

Social Activity

The objective of the project is to engage from Buddhist monks and community to work together on climate change and community concerns.

A group of students from UWCSEA-EAST- Singapore have made their efforts to make the fundraising in Singapore and then it has been funded to contribution of a house building for a widower-disadvantaged family in Khvan Meas village, Putsor commune, Bati district of Takeo province.

The rooms have been designed and convenient for international and national visitors, volunteers, donors and private sectors who are intending to help develop and consciously work for our Green Umbrella.

The construction has been funded by Mr. Zhi-Xing Lai from Taiwan and it is located in the compound of the Chambok Bimeas pagoda and it is very beneficial for all Cambodian and overseas citizens to make their feeling in a silent way or can go for a walk around it and watch everything available in the pagoda. More significantly, you can just spend a little time to meditate in a temple called “Meditation Building”.

The contribution of the tree plantings are now really very important for people, community and our world it will be able to attract the rain water, protect from natural disaster, wild life and a life for people.
